**PAMET Northern California Chapter - Winter Seminar 2019**  
Program # 0096-347-19

**Hematology Workshop**

Carlo Ledesma, MS, SH(ASCP), QLS, MT(ASCP), MT(AMT)

This continuing education seminar will focus on the benchwork of clinical laboratory scientist. Attendees will learn to correlate lab findings with the pathophysiology of hematologic malignancies and disorders. Attendees will also learn the different mechanism of diseases and the different, most up-to-date diagnostic algorithm in the diagnosis of hematologic disorders

**Objectives:**

**Workshop 1: RBC Morphology**

After the presentation, attendees will be able to:

1. Correlate different RBC morphology with disorders
2. Correlate laboratory findings with the different RBC morphologies
3. Discuss the pathophysiology of common RBC disorders
4. Discuss the molecular basis of RBC disorders

**Workshop 2: Abnormal WBC workshop**

After the presentation, attendees will be able to:

1. Discuss the molecular basis of abnormal WBC morphology
2. Discuss the different diagnostic algorithm to conclude different WBC disorders
3. Discuss the morphologic findings of abnormal WBCs

**Workshop 3: Molecular markers in leukemia**

1. Discuss the different methodologies and tests in the diagnosis of leukemia
2. Discuss the new WHO guidelines in the diagnosis of hematologic malignancies
3. Correlate the different molecular defects with morphologic findings

**Workshop 4: Case Study Workshop**

1. Correlate laboratory findings with the different disease states
2. Discuss the different diagnostic tests to diagnose different hematologic disorders
3. Discuss the pathophysiology of different diseases presented in the workshop.
