Job Description:

JOB OVERVIEW

The Clinical Lab Scientist (CLS) is responsible for all work assigned in all areas of the Clinical Core Laboratory including routine procedures, method improvement and development and evaluation. All work performed is to be completed within a required time frame insuring shortest turnaround time as it relates to patient care. All work is to be accurately and professionally documented and reported. This position performs laboratory testing procedures, computer functions, quality control and preventative maintenance. This position performs all duties in a manner that denotes the team concept and reflects the UCSF and ZSFG mission, vision and values.

Note: \$5,000 sign-on bonus. For questions, please send email to jean.branch@ucsf.edu.

ZSFG CLINICAL LABORATORY – CORE LAB

The Clinical Laboratory (CL) at Zuckerberg San Francisco General (ZSFG) provides laboratory testing services for inpatients and outpatients of ZSFG, Laguna Honda Hospital, District Health Centers and other facilities under the auspices of the SF Public Health Department.

ABOUT UCSF

The University of California, San Francisco (UCSF) is a leading university dedicated to promoting health worldwide through advanced biomedical research, graduate-level education in the life sciences and health professions, and excellence in patient care. It is the only campus in the 10-campus UC system dedicated exclusively to the health sciences.

Graduation from college with a Bachelor's degree in biochemistry or an appropriate scientific field
Possession of a California Clinical Laboratory Scientist License or a similar license of equal or higher level issued by the State Department of Health

Considerable knowledge of chemistry instrumentation

PC skills and experience with a laboratory computer system

Able to work independently, under pressure; recognize and resolve problems while maintaining a high level of organization

Note: Physical/health screening, fingerprinting and background check required.

Two years of current chemistry and/or hematology clinical laboratory experience

Experience with high volume analyzers

Effective verbal and written communication skills relative to clinical results

Possession of a California Clinical Laboratory Scientist License or a similar license of equal or higher level issued by the State Department of Health

Job Requirements:

To apply for this position, please copy and paste the following link into your browser address bar:

<https://ucsfmc.contacthr.com/63787755>

Job Description:

At UCSF Health, our mission of innovative patient care, advanced technology and pioneering research is redefining what's possible for the patients we serve - a promise we share with the professionals who make up our team. Ranked by U.S. News & World Report as the number one hospital in California - and among the top five in the country - UCSF Health is committed to providing the most rewarding work experience while delivering the best care available anywhere. In an environment that allows for continuous learning and opportunities for professional growth, UCSF Health offers the ideal atmosphere in which to best use your skills and talents.

Department Description

At UCSF Medical Center, our Clinical Laboratory supports the inpatient population of our tertiary care hospital, an Emergency Department and outpatient clinics including Hematology Oncology. The Hematology Lab provides a complete menu of testing for hematologic disorders, coagulopathies, transplant surgeries, pediatrics and neonatal care.

We provide a stimulating and fast paced environment for Clinical Laboratory Scientists, with in house education opportunities.

Job Summary

To perform procedures related to Cellular Therapy and Blood and Marrow Transplant Laboratory. To perform procedures related to the preparation, concentration, purification and purging of bone marrow or peripheral blood for transplantation. To be able to follow procedures while working independently to produce a sterile and safe product for transplant to intended recipient.

To initiate troubleshooting of laboratory equipment and procedures as needed. To follow established quality control procedures and to fully document tasks performed. To assist and ensure smooth operation of the Pediatric Cellular Therapy Laboratory. To help develop, review and implement procedures and to help in laboratory inspection and accreditation efforts.

Required Qualifications

- * Current California Clinical Laboratory Scientist License (Medical Technology) - Generalist
- * College graduate with a BA/BS in a related science
- * Thorough knowledge in the fields of Cellular Therapy Processing and Storage and in Immunology
- * Good technical and teaching skills
- * Ability to make sound decisions and good judgment
- * High level of awareness for unusual or abnormal results and good problem solving skills
- * Strong interpersonal skills and relate to supervisors and co-workers

- * Excellent communication skills
- * Produce accurate, complete, legible records of work performed
- * Recent experience in a clinical laboratory setting that handle blood products using aseptic technique, knowledge of cGMP and blood product component processing and isolation.
- * The flexibility to orient and work at all UCSF Medical Center locations

Preferred Qualifications

- * Two years experience in Cellular Therapy, Blood and Marrow Processing or Genetics laboratory
- * Two years experience in Blood Banking, Component Processing or Transfusion service within past five years

Licensure/Certification

- * Current California Clinical Laboratory Scientist License (Medical Technology) - Generalist

Living Pride Standards

Service Excellence

* Demonstrates service excellence by following the Everyday PRIDE Guide with the UCSF Medical Center standards and expectations for communication and behavior. These standards and expectations convey specific behavior associated with the Medical Center's values: Professionalism, Respect, Integrity, Diversity and Excellence, and provide guidance on how we communicate with patients, visitors, faculty, staff, and students, virtually everyone, every day and with every encounter. These standards include, but are not limited to: personal appearance, acknowledging and greeting all patients and families, introductions using AIDET, managing up, service recovery, managing delays and expectations, phone standards, electronic communication, team work, cultural sensitivity and competency.

* Uses effective communication skills with patients and staff; demonstrates proper telephone techniques and etiquette; acts as an escort to any patient or family member needing directions; shows sensitivity to differences of culture; demonstrates a positive and supportive manner in which patients / families/ colleagues perceive interactions as positive and supportive. Exhibits team work skills to positively acknowledge and recognize other colleagues, and uses personal experiences to model and teach Living PRIDE standards.

* Exhibits tact and professionalism in difficult situations according to PRIDE Values and Practices

* Demonstrates an understanding of and adheres to privacy, confidentiality, and security policies and procedures related to Protected Health Information (PHI) or other sensitive and personal information.

* Demonstrates an understanding of and adheres to safety and infection control policies and procedures.

* Assumes accountability for improving quality metrics associated with department/unit and meeting organizational/departmental targets.

Work Environment

* Keeps working areas neat, orderly and clutter-free, including the hallways. Adheres to cleaning processes and puts things back where they belong. Removes and reports broken equipment and furniture.

* Picks up and disposes of any litter found throughout entire facility.

* Posts flyers and posters in designated areas only; does not post on walls, doors or windows.

* Knows where the Environment of Care Manual is kept in department; corrects or reports unsafe conditions to the appropriate departments.

* Protects the physical environment and equipment from damage and theft.

The flexibility to orient and work at all UCSF Medical Center locations is required.

Equal Employment Opportunity

The University of California San Francisco is an Equal Opportunity/Affirmative Action Employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, age, protected veteran or disabled status, or genetic information. Further information about the University of California, San Francisco, is available at diversity.ucsf.edu. UCSF seeks candidates whose skills, and personal and professional experience, have prepared them to contribute to our commitment to diversity and excellence, and the communities we serve.

Job Description:

At UCSF Health, our mission of innovative patient care, advanced technology and pioneering research is redefining what's possible for the patients we serve - a promise we share with the professionals who make up our team. Ranked by U.S. News & World Report as the number one hospital in California - and among the top five in the country - UCSF Health is committed to providing the most rewarding work experience while delivering the best care available anywhere. In an environment that allows for continuous learning and opportunities for professional growth, UCSF Health offers the ideal atmosphere in which to best use your skills and talents.

Department Description

The Cytogenetics Laboratory at UCSF Medical Center performs a wide range of standard and molecular cytogenetic testing, including various chromosome banding analysis, fluorescence in situ hybridization (FISH) and DNA array-based comparative genomic hybridization (aCGH) for constitutional chromosomal disorders and cancers. In addition, the lab is one of the few of its kind in the world that has the ability to perform advanced chromosome microdissection-based techniques to quickly and precisely characterize chromosomal rearrangements which provide insight into various conditions that other methods may not be able to characterize.

The lab provides analysis on prenatal specimens, such as amniotic fluid, chorionic villi and fetal cord blood; postnatal specimens, such as peripheral blood and skin biopsy; products of conception and cancer specimens, such as marrow and bone core. In addition, the lab may also provide cytogenetics analysis for stem cells and other cultured cells for research and other purposes upon request and availability of lab resources.

Established in 2005, the laboratory is located at UCSF's China Basin campus. It is certified by the Clinical Laboratory Improvement Act (CLIA,) College of American Pathologists (CAP) and California Department of Health Services for providing clinical testing.

Job Summary

Perform test procedures in microarray, wet lab tasks including culturing, FISH (Fluorescent In Situ Hybridation) in Cytogenetics and other tests using molecular techniques (for example, SNP microarray). Transcribe and report test results. Operate laboratory instrumentation & equipment to accurately generate test results. Initiate troubleshooting of errant laboratory instrumentation & equipment as needed. Follow established quality control procedures and participate in all associated tasks in the section. Must be able to work in a high volume setting.

Required Qualifications

- * California Clinical Laboratory Scientist (CLS) license
- * Bachelor of Science degree
- * Recent experience in clinical laboratory technology
- * The flexibility to orient and work at all UCSF Medical Center locations

Preferred Qualifications

- * Microarray or molecular experience
- * Previous experience in high-volume, doing clinical laboratory testing
- * Experience with molecular testing experience, microarray, FISH, wet lab culturing experience

Licensure/Certification

- * California Clinical Laboratory Scientist (CLS) license
